

AgroStat 2026 – 17th Edition Sponsorship Opportunities

Presentation

The biannual AgroStat conference series is organized by the **Agro-Industry Group of the French Statistical Society (SFdS)**, a non-profit organization that brings together researchers, engineers, educators, and statistics users (<https://www.sfds.asso.fr>). The 17th edition, AgroStat 2026, will be held from **October 5th to 7th, 2026, in Dijon, France**, and will be organized by the National Research Institute for Agriculture, Food and Environment, Institut Agro Dijon, and Université Bourgogne Europe.

<https://agrostat2026.sciencesconf.org/>

AgroStat 2026 will bring together internationally **recognized researchers** alongside **representatives from industrial organizations** to review the **latest advances in data collection methods, statistics and data science, discuss emerging needs, and anticipate future challenges in agro-food sciences**. The conference aims to foster dialogue across disciplines, highlight methodological innovations, and encourage early collaboration among experts through dedicated thematic sessions.

The scientific program will include keynote lectures, oral presentations, and poster sessions structured around six thematic areas: **data quality, reliability & reproducibility; heterogeneous data integration and fusion; text analytics & knowledge engineering; modeling & digital twins; behavioral & physiological analysis in context; visual data processing & automated image-based analysis**.

These themes will be approached through **theoretical and applied perspectives** in **sensometrics, chemometrics, signal processing, experimental design, risk analysis, artificial intelligence** and **big data, meta-analysis, and software tools**.

In addition to the scientific program, AgroStat 2026 will offer delegates an exceptional opportunity to experience the rich culture and heritage of Dijon. As the capital of the Burgundy–Franche-Comté region, Dijon is a “City of Art and History” with an UNESCO World Heritage-listed area, part of the Climats de Bourgogne. The city features a beautifully preserved, entirely pedestrian city center, with half-timbered houses, Romanesque and Gothic churches, and 17th and 18th-century mansions, showcasing the medieval streets of the former capital of the Dukes of Burgundy. Dijon is also renowned for its culinary heritage, from mustard to snails, crème de cassis, and gingerbread.

Gold registration benefits

As a Gold registrant, your organization will gain enhanced visibility throughout the conference:

- **Logo display** on the official conference website and during the interludes between presentations.
- A **commercial poster** and/or an **exhibition booth** to showcase your products, services, or innovations.
- **Direct exposure to a highly engaged audience:** AgroStat 2026 is expected to gather over 100 participants, all interested in data, software, analytics, and related technologies.
- **Networking opportunities** with leading researchers and industry representatives.
- Exclusive recognition as a **Gold partner** of AgroStat 2026.
- **Cost-effective investment:** Gold registration is available for only **€1,000**, just **€300 more than the standard €700 registration**, offering maximum visibility at a minimal additional cost.

Gold registration is designed for organizations looking to maximize their presence, connect with scientific and industrial leaders, and support the advancement of agro-food research and statistics.

The conference will be followed by the **annual meeting of the European Sensory Network** on **October 8th and 9th**, offering additional opportunities for engagement and collaboration.
